

Chromebook Training Information Guide

Summary:

This document provides comprehensive training information for using Chrome OS on Chromebooks, including setup, resources, and printing instructions.

Chrome Operating System

- Chrome OS is an open-source operating system based on Linux, primarily using the Google Chrome browser.
- Data is stored in the cloud, not on the device.
- Supports only web capabilities; executables cannot be run.
- Automatic updates occur every 6 weeks.
- Users can share devices with preferences transferred via Google accounts.

Chrome OS Tips & Links

- Provides links to Chromebook support, training videos, and keyboard shortcuts.
- Includes various training video links covering Chromebook basics, touchpad usage, keyboard tips, myths, and sharing.

National Resources

- Lists important internet bookmarks for volunteers, including IRS documents and tools for tax preparation.
- Provides access to various tax-related resources and tools.

Individual Resources

- Contains documents like modified publications, policy manuals, and training slides.
- Includes personal annotations and fillable PDFs for state-specific documents.

Printer Setup Instructions

- Instructions for connecting printers to Chromebooks via Wi-Fi or USB.
- Manual setup steps for Brother printers and finding printer IP addresses.

Acer Chromebook Model 315

- Specifications include Chrome OS, 4 GB memory, AMD A6 processor, and 15.6-inch Full HD display.
- Details on ports and power button location.

Connecting to New Network

- Step-by-step guide for changing network connections on a Chromebook.
- Instructions for entering passwords and confirming connections.
